

# 2024 Primemas Career Opportunities

## Company Overview

Primemas is a semiconductor startup headquartered in the U.S. with an R&D center in Seoul. We specialize in designing and developing multipurpose SoC platform chiplets, called **hub chiplets**, which are poised to accelerate computational system development and provide a notable reduction in their production costs. By employing industry-standard high-performance die-to-die interfaces, we support seamless integration with a broad spectrum of application-specific chiplets and ensure our applicability across mainstream technological markets, such as AI, CXL, data analytics, and more.

We are currently growing our team and are looking for talented and motivated individuals of various levels of experience.

## Job Openings

- Design Engineer
- Design Verification Engineer
- System PI/SI Engineer
- System Software Engineer
- Application Engineer (Hardware)
- Application Engineer (Software)

## Period

February 27<sup>th</sup> – Ongoing

## Language

English or Korean

## Eligibility

B.S. or M.S. in Computer Science, Electrical Engineering, or related field

## Process

Document Screening -> 1<sup>st</sup> Interview -> 2<sup>nd</sup> Interview -> Employment

## Location

Gangnam, Seoul
